OBJECTIVE

B.Tech Computer Science student seeking a challenging internship to apply technical and analytical skills, gain hands-on industry experience, and build a strong foundation for a long-term career in technology and data-driven innovation.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL, JavaScript, HTML/CSS

Frameworks: React, Node.js

Developer Tools: Git, Google Cloud Platform, VS Code, Visual Studio, PyCharm, Eclipse

Libraries: pandas, NumPy, Matplotlib, Seaborn

PROJECTS

Plotbook | *React, Next.js, MapBox API, Prisma*

May 2025

A device-agnostic **Property Intelligence app** providing interactive map-based property insights with wealth profiles of ownership.

- Designed a responsive UI/UX with Shadcn and integrated Mapbox for interactive property visualization.
- Assisted in frontend layout and interaction design.
- Contributed to pitch decks and documentation.

Face Detection System | *Python, OpenCV*

May 2024

A real-time face detection software that uses the camera to identify the presence of faces instantly.

- Built a real-time face detection application using Haar cascade classifiers.
- Captured and processed live video feed to identify and track human faces.
- Applied grayscale conversion and detectMultiScale for efficient recognition.
- Displayed annotated video frames with bounding boxes around detected faces.

AI-Powered Jewelry Kiosk (Evol Jewels) | *Python, React, ARKit, OpenCV, Flask*

Oct 2025

An intelligent in-store kiosk offering a personalized jewelry styling experience that enhances customer engagement and drives sales.

- Engineered a dynamic AI-driven kiosk that starts with an interactive quiz to identify customer intent, preferences, and budget.
- Developed a recommendation engine matching users with celebrity-inspired jewelry styles using machine learning.
- Integrated AR try-on functionality to reduce purchase hesitation through real-time virtual jewelry visualization.
- Implemented emotion tracking to personalize product suggestions and improve customer experience.
- Collaborated on UX design and business alignment to elevate the Evol Jewels brand experience.

WORKSHOPS & ACHIEVEMENTS

FuelEd2.0 Contest | *2nd Place Winner out of 33+ teams*

May 2025

- Developed a device-agnostic property intelligence app using Next.js and Tailwind CSS.
- Contributed to feature implementation, frontend layout, and created pitch decks & technical documentation.
- Designed responsive UI/UX using Shadcn, and integrated Mapbox for interactive property visualization.

IITH Workshop | *Artificial Intelligence and Machine Learning*

May 2024

- Attended a hands-on workshop covering core AI/ML concepts including supervised/unsupervised learning and neural networks.
- Built ML models on real-world datasets through practical lab sessions.
- Collaborated on and presented a capstone AI project as part of the workshop.

DSA Presentation | *Data Structures and Algorithms*

Nov 2024

- Developed a structured presentation covering key DSA topics such as arrays, linked lists, stacks, trees, and graphs.
- Demonstrated algorithmic approaches like recursion, sorting, searching, and their time complexities.
- Showcased real-world applications of DSA concepts through examples and problem-solving cases.

EDUCATION

GITAM University

Bachelor of Computer Science Engineering with specialization in Data Science

Hyderabad, TS

2023 – 2027
